Political risk ratings

Very Low | Low | Medium | High | Extreme

Political risk evaluates the likelihood of government interference and political instability, and their impact on the business environment. Political risk assesses general political stability and policy issues such as regulatory change, high-level corruption, reputational risk, expropriation and nationalisation, contractual interference, sovereign default and non-payment, and international sanctions. While the rating applies generally to the designated jurisdiction, political risk may vary considerably between industry sectors and investor nationalities.
