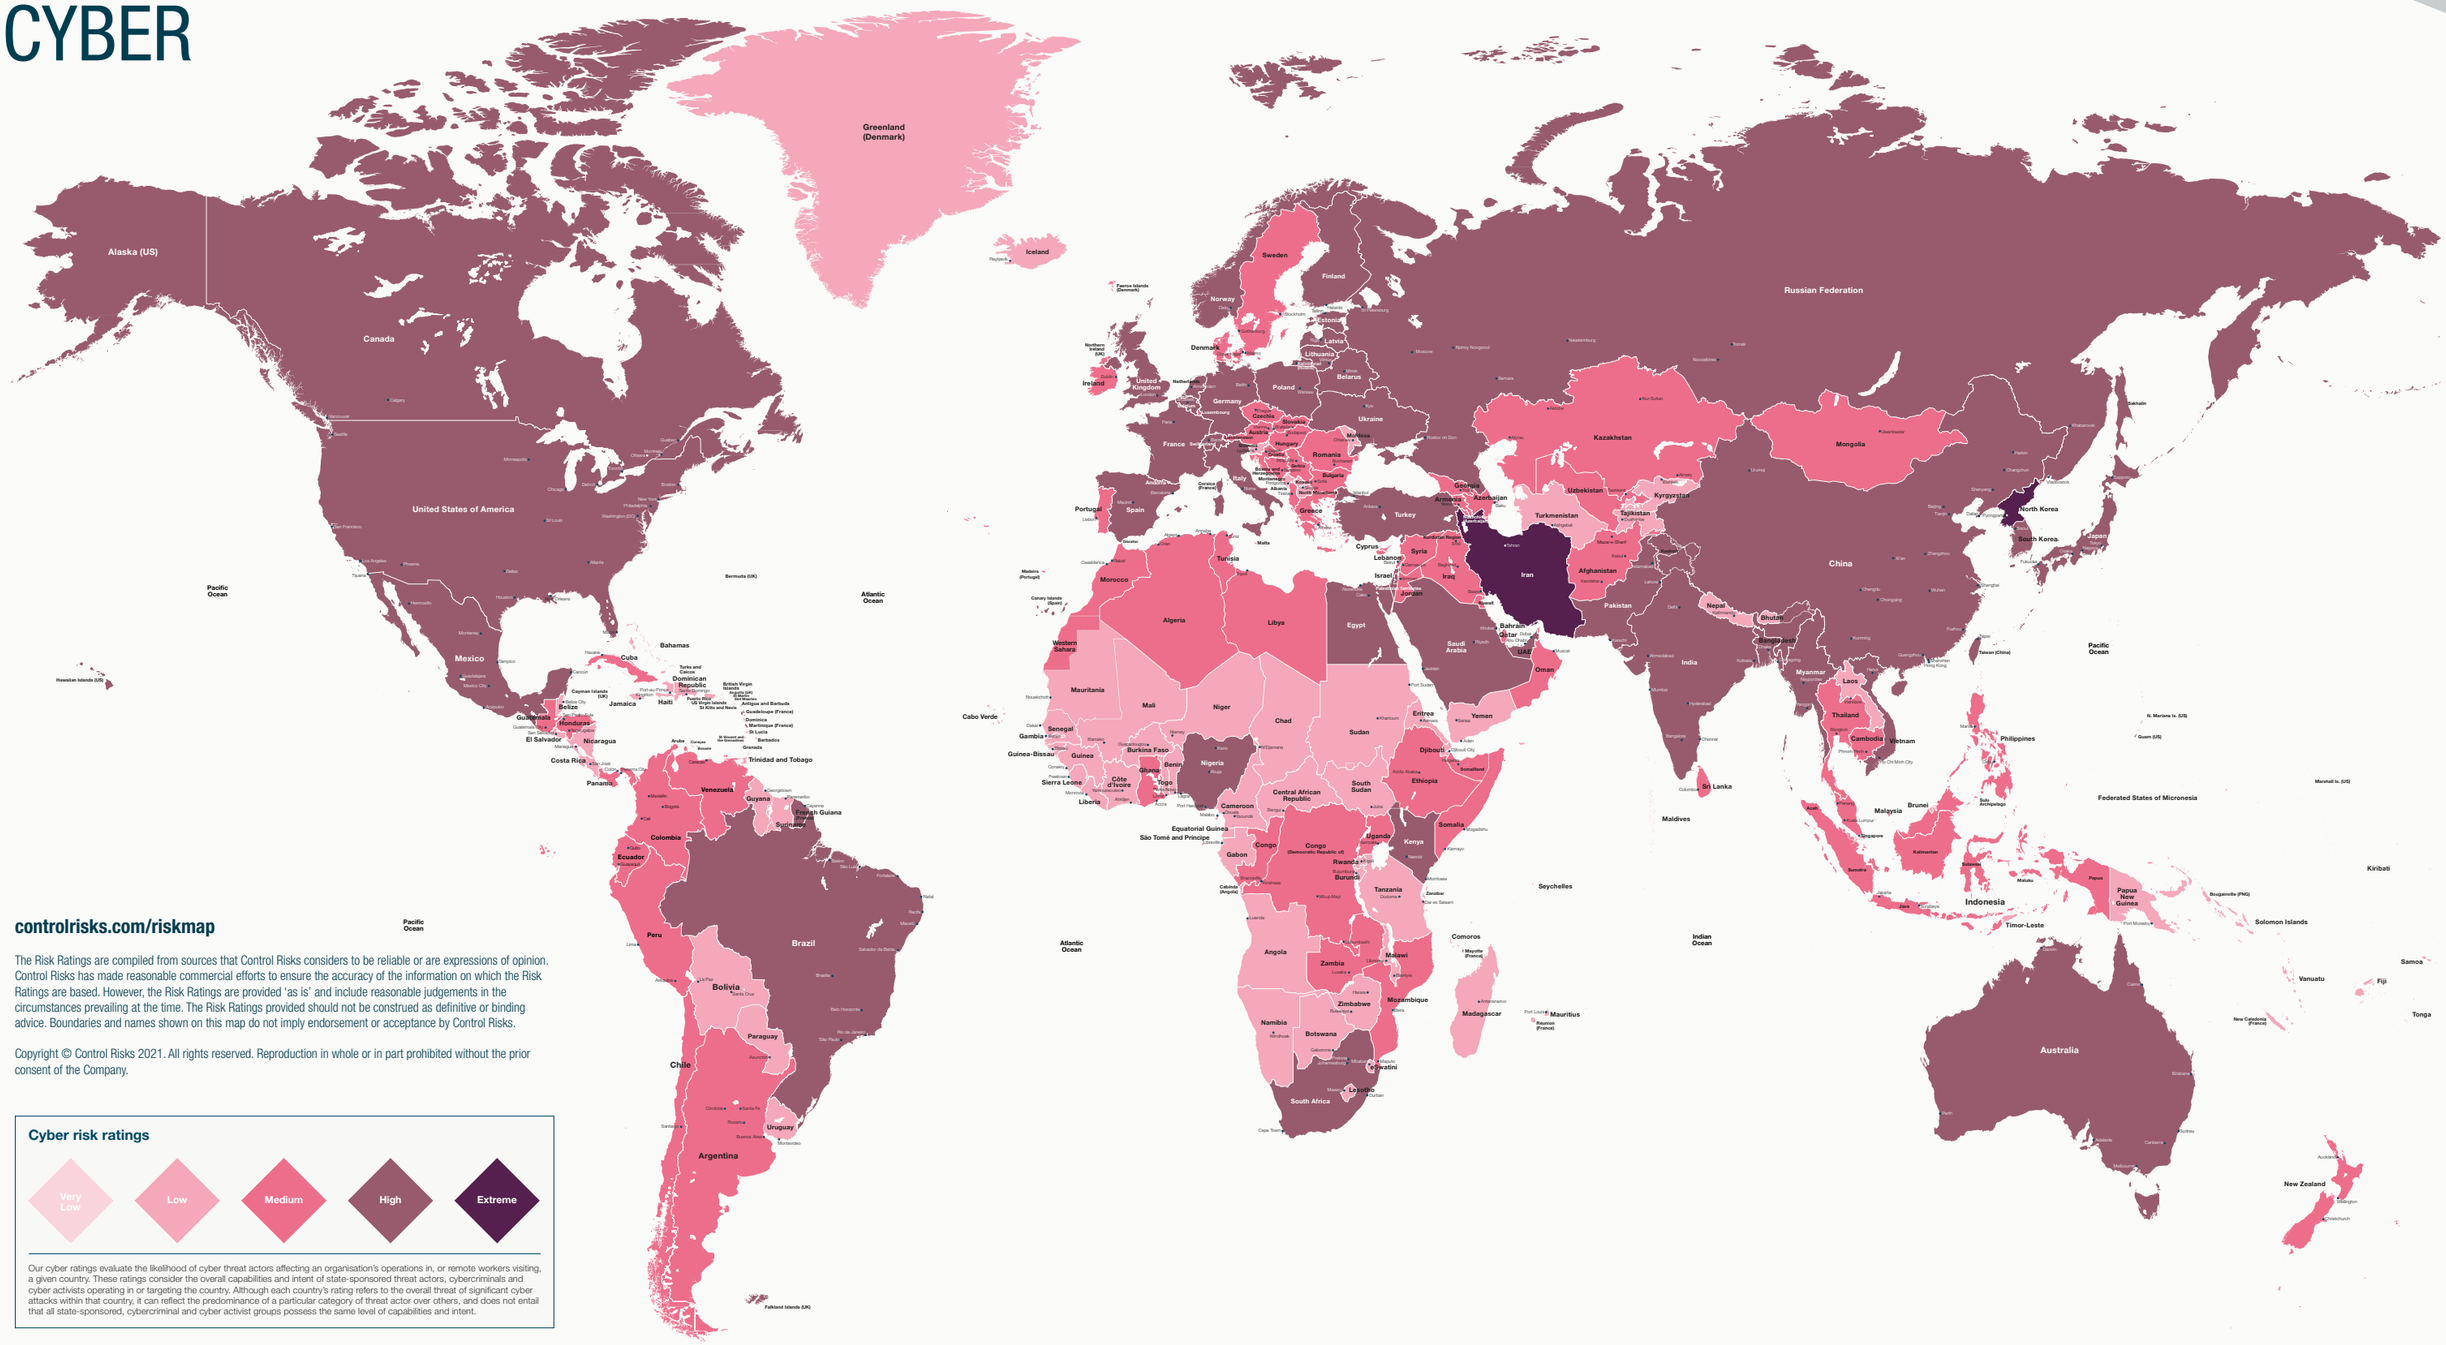
RISKMAP 22

CYBER



controlrisks.com/riskmap

The Risk Ratings are compiled from sources that Control Risks considers to be reliable or are expressions of opinion. Control Risks has made reasonable commercial efforts to ensure the accuracy of the information on which the Risk Ratings are based. However, the Risk Ratings are provided 'as is' and include reasonable judgements in the circumstances prevailing at the time. The Risk Ratings provided should not be construed as definitive or binding advice. Boundaries and names shown on this map do not imply endorsement or acceptance by Control Risks.

Cyber risk ratings

Very Low | Low | Medium | High | Extreme

Our cyber ratings evaluate the likelihood of cyber threat actors affecting an organisation's operations in, or remote workers visiting, a given country. These ratings consider the overall capabilities and intent of state-sponsored threat actors, cybercriminals and cyber activists operating in or targeting the country. Although each country's rating refers to the overall threat of significant cyber attacks within that country, it can reflect the predominance of a particular category of threat actor over others, and does not entail that all state-sponsored, cybercriminal and cyber activist groups possess the same level of capabilities and intent.
